## EXPERIENCE

### NetJets, Columbus, OH— *Software Developer*

July 2018 - Present

- Working in an agile focused environment.
- Made wide array of improvements and additions to mobile app, website, and backend.
- Worked on large portion of the tech stack.
- Quickly learned new technologies with minimal guidance.
- Mentored team members that were just learning programming.

### GE Aviation, Grand Rapids, MI— *Intern Software Developer*

August 2017 - December 2017

- Worked in an agile environment, attending scrums and sprint planning meetings.
- Assisted in development of *Assert* tool, which assisted users in capturing software requirements, analyzing them, and generating test cases for said requirements.
- Developed “translator” portion of *Assert*, which converted SADL requirements to Lisp.
- Gained experience working on a massive code base.

### eLogic, Victor, NY — *Developer*

July 2016 - July 2017

- Primary role was an Oracle CPQ developer.
- Led the conversion of a library of Python code to a proprietary scripting language.
- Worked in small teams and often without direct supervision.
- Occasionally did work with JavaScript and Microsoft CRM.
- Interacted directly with end customers.

### Computer Science Dept, RIT — *Student Lab Instructor*

August 2015 - May 2016

- Assisted in teaching students course material during lab sessions.
- Duties included grading work, running lab, and hosting tutoring hours at CS mentoring center.
- Tutoring hours included helping students with Python, Java, or C programming questions.

## PROJECTS

### Goblet algorithm — *Java*

Created a digital representation of the board game “Goblet” and an algorithm to play it. 15th best algorithm out of 100+ submitted.

### Game addon — *Lua*

Created addon “Tokenizer” to sort items for online game using Lua.
